

# Poster Session 1

*Posters may be put on display at the start of the conference.  
Presenters are only expected to be by their posters during the assigned session.*

- 1 **Anita Slonimska**  
Simultaneous information encoding in Italian Sign Language (LIS): methodology and preliminary results
- 2 **Arushi Garg**  
The perception-production interface: Insights from cumulative semantic effects
- 3 **Basil Preisig**  
The role of phase coupling in speech production: transcranial alternating current stimulation (tACS) during verbal repetition
- 4 **Carl Börstell**  
Articulatory plurality as a universal iconic strategy
- 5 **Chih Yeh (April)**  
Right hemisphere syntactic processing suppressed for native language is seen for a newly learned grammar— evidence from Event-Related potentials.
- 6 **Christoph Aurnhammer**  
Gated Cells Improve Fit of Neural Network Language Models on Human Reading Data
- 7 **Cigdem Turan**  
Facial Expressions of Online Sentence Comprehension
- 8 **Claudia Peñalosa**  
A computational approach to healthy bilingual naming performance and naming impairment in aphasia
- 9 **Dick van den Broek**  
From genes to language: how CNTNAP2 affects sentence processing in human neural networks
- 10 **Elisabeth Süß**  
Perception of Native and Non-native Lombard Speech
- 11 **Eric Hoekstra**  
Folk etymology, neighbourhood proximity and the gradual nature of compositionality
- 12 **Francie Manhardt**  
Iconicity matters: Signers and speakers view spatial relations differently prior to linguistic production

- 13 **Gyu-Ho Shin**  
Passives are difficult to process, but can be learnt: Sentence comprehension by adult Chinese-speaking learners of Korean
- 14 **Ileana L. Camerino**  
Role of White Matter Hyperintensity at Specific Locations in Cerebral Small Vessel Disease: A Voxel-Based Lesion Symptom Mapping Study
- 15 **Jang Ha-A-Yan**  
Korean adolescents' behavioral and neural responses to the congruent and incongruent matches of verbs and case markers in a picture-sentence verification task
- 16 **Joao Ferreira**  
Role of basal ganglia in producing inflections
- 17 **Julia Egger**  
Neural correlates of incidental L2 auditory word learning
- 18 **Karl Neergaard**  
Mental effort account of auditory lexical activation: lexicality and syllable segmentation
- 19 **Katharina Kühne**  
Subjective ratings of human and artificial voices: An exploration of the auditory uncanny valley
- 20 **Katie Mudd**  
Investigating the factors maintaining sign languages using an agent based model
- 21 **Klara Schevenels**  
Review: Treatment-induced neuronal reorganisation in aphasia
- 22 **Larissa Sofia Balduin-Philipps**  
Well-being and side effects in a tDCS-supported verbal recognition task: The older, the better tolerated?
- 23 **Linda Taschenberger**  
Interference in joint picture naming
- 24 **Maria Economou**  
Myelin water imaging in children with dyslexia and typically developing children

## Poster Session 2

*Posters may be put on display at the start of the conference.  
Presenters are only expected to be by their posters during the assigned session.*

- 25 **Annika Brandt**  
The acquisition of grammatical gender agreement through natural input in beginning second language learners
- 26 **Mariia Naumovets**  
The perceptual span of L2 English speakers with different L1 alphabetic systems
- 27 **Marloes Mak**  
Sensory simulation, motor simulation and mentalizing during narrative reading: Insights from eye-tracking
- 28 **Marlou Rasenberg**  
How linguistic common ground management affects online language comprehension
- 29 **Marta Marecka**  
An ear for language: basic auditory skills are linked to more efficient novel word learning
- 30 **Mehdi Bakhtiar**  
The role of right hemisphere activation in language recovery in left-brain damage patients with chronic aphasia
- 31 **Merel Wolf**  
The Relationship between Reading and Listening Comprehension: Overlap in Constructs and Foundational Skills
- 32 **Mingyu Yuan**  
To Examine L2-L1 Noncognate Translation Priming Effect in Chinese-English Bilinguals with Different Ages of Acquisition: A Research Proposal
- 33 **Monica Wagner**  
What's in an accent? A segmental analysis of Dutch-accented English
- 34 **Natascha Roos**  
Context-dependent language processing: towards a clinical tool
- 35 **Nikki Janssen**  
Differentiation of Primary Progressive Aphasia variants
- 36 **Patricia León-Cabrera**  
Electrophysiological correlates of anticipatory processes over the course of sentence processing

- 37 **Rosanne Abrahamse**  
P300 versus MMN: The clinical potential of ERPs to assess auditory discrimination abilities
- 38 **Ruth Kessler**  
Eye-tracking evidence for lexical computation in idiomatic phrases
- 39 **Sara Bögels**  
Creating shared conceptual representations
- 40 **Stanley Donahoo**  
Processing expressives: Insights for semantic-pragmatic theory
- 41 **Stella Guldner**  
Neural Correlates of Socio-Emotional Trait Expression in Voices
- 42 **Sung Eun Lee**  
Korean adolescents' behavioral and neural responses to the congruent and incongruent matches of verbs and case markers in a picture-sentence verification task
- 43 **Sun-Young Lee**  
Processing burden of long distance reflexives compared to noun phrases: Evidence from an ERP study
- 44 **Sun-Young Lee**  
Korean adolescents' behavioral and neural responses to the congruent and incongruent matches of verbs and case markers in a picture-sentence verification task
- 45 **Xiaochen Zheng**  
Monitoring Language Selection Errors in Switching: Not all about Conflict.
- 46 **Xiaomeng Ma**  
A systematic review of genetic disorder and language development
- 47 **Xin Xie**  
Perceiving native- and foreign-accented speech: A problem of probabilistic inference under uncertainty
- 48 **Yannick Jadoul**  
Demonstrating Parselmouth: Integrating Praat into a complex Python workflow
